DE L'UNIVERSITÉ D'OTTAWA

FOR IMMEDIATE RELEASE | POUR PUBLICATION IMMÉDIATE

L'Institut de cardiologie parmi les meilleurs établissements de recherche au monde

OTTAWA, le 3 avril 2012 – Un récent classement mondial vient confirmer la qualité indéniable de la recherche qui se fait à l'Institut de cardiologie de l'Université d'Ottawa (ICUO) en plaçant celui-ci dans la tranche supérieure de 2 % des meilleurs établissements de recherche au monde. Cette nouvelle nous arrive alors que *The Lancet*, la plus prestigieuse revue médicale au monde, vient donner son aval au tout premier test génétique réalisé au chevet du patient, mis au point par des chercheurs de l'ICUO.

Dans le plus récent classement SCIMAGO des meilleurs établissements de recherche dans le monde (*SIR Normalized Impact Report*), l'Institut de cardiologie de l'Université d'Ottawa se classe au 57^e rang sur 3 042 établissements de recherche. Le rapport évalue six indicateurs clés, incluant l'incidence de la recherche, la spécialisation thématique, l'envergure de la production et les réseaux internationaux de collaboration de ces établissements.

« Ces résultats sont remarquables, mais ils ne représentent que la pointe de l'iceberg puisque chaque jour nos chercheurs participent, ici même à Ottawa, à des recherches de pointe reconnues dans le monde entier, qui influencent la vie de patients partout sur la planète », explique le D^r Robert Roberts, président-directeur général de l'Institut de cardiologie de l'Université d'Ottawa.

Alors que le plus récent budget fédéral révèle que le gouvernement s'engage à fournir des ressources supplémentaires pour soutenir la recherche de pointe dans les établissements de recherche, ces résultats confirment le rôle unique que joue l'Institut de cardiologie de l'Université d'Ottawa dans la recherche sur la santé cardiovasculaire et continuent à positionner notre organisation comme acteur clé du milieu de la recherche au Canada.

Le *SIR World Report 2011* comprend des établissements d'enseignement supérieur et d'autres organismes de recherche d'envergure différente, qui ont des missions différentes et qui proviennent de différents pays sur les cinq continents.

L'Institut de cardiologie de l'Université d'Ottawa est le centre de santé cardiovasculaire le plus important et le plus innovateur au Canada, qui se consacre à la recherche, au traitement et à la prévention des maladies du cœur. Au service de la communauté locale, nationale et internationale, nous sommes les pionniers d'une nouvelle ère dans le domaine de la santé cardiaque.

Pour de plus amples renseignements, consultez le rapport SCIMAGO ci-joint. [en anglais]

SIR World Report 2011 :: Normalized Impact Report

NORMALIZED IMPACT REPORT

This document is an attachment extracted from SIR World Report 2011, it contains exactly the same information but the ordering variable has been set to Normalized Impact. All the values as well as institutions coincide with those included in SIR World Report 2011 :: Global Ranking also available at <http://www.scimagoir.com>

This report uses two decimal values for the Normalized Impact variable instead just one as it is usual in SIR Reports in order to avoid an extremely high number of identical ranks in institutions. For those institutions which have identical NI values using two decimals, the alphabetical order has been set.

Introduction

The current report involves the third release of our annual series *Scimago Institutions Rankings World Reports*, that based on quantitative data of citation and publication shows bibliometric indicators that unveil some of the main dimensions of research performance of worldwide research-devoted institutions. As in former editions, **SIR World Report 2011** aims at becoming an evaluation framework of research performance to Worldwide Research Organizations.

The report shows six indicators that will help users evaluate the scientific impact, thematic specialization, output size and international collaboration networks of the institutions.

The period analyzed in the current edition covers 2005-09. The tables include institutions having published at least 100 scientific documents of any type, that is, articles, reviews, short reviews, letters, conference papers, etc., during the year 2009 as collected by worldwide leader scientific database Scopus by Elsevier. The report encompasses Higher Education Institutions (HEIs) as well as other research-focused organizations from different sizes, with different missions and from countries in the five continents. Institutions are grouped into five Institutional Sectors: Higher Education, Health System, Government Agencies, Corporations and Others.

To elaborate this report, we carry out the challenging task of identifying and disambiguating all the institutions through an overwhelming number of scientific articles, reviews and conference papers contained in Scopus. The task, which is carried out by a mix of computer and human means, comprises the identification and gathering of institution's affiliation variants under a unique identifiable form as well as the classification into institutional sectors.

SIR World Reports 2011 is the most comprehensive ranking of Worldwide Research Institutions. Following the goal of embracing every institution around the world with significative scientific output, the ranking now includes 3,042 institutions that together are responsible for more than 80% of worldwide scientific output during the term 2005-09 as indexed in Elsevier's Scopus database.

The intended target audience of SIR World Report 2011 is formed by policymakers, research managers, researchers, media and general public interested in finding out about research performance of worldwide Institutions.

Disclaimer notice:

SIR World Report 2011 IS NOT A LEAGUE TABLE. The ranking parameter – the Normalized Impact of institutions – should be understood as a default rank, not our ranking proposal. The only goal of this report is to characterize research outcomes of organizations so as to provide useful scientometric information to institutions, policymakers and research managers so they are able to analyze, evaluate and improve their research results. If someone uses this report to rank institutions or to build a league table with any purpose, he/she will do it under his/her own responsibility.

Indicators

Selected indicators seek to reveal main aspects of research size, performance, impact and internationalization at Worldwide Research Institutions.

O::Output

An institution's publication output reveals its scientific outcomes in terms of published documents in scholarly journals.

IC::International Collaboration

IC shows an institution's output ratio that has been produced in collaboration with foreign institutions. The values are computed by analyzing the institution's output whose affiliation includes more than one country address over the whole period.

NI::Normalized Impact

The values, expressed in percentages, show the relationship of an institution's average scientific impact and the world average, which is 1, --i.e. a score of 0.8 means the institution is cited 20% below average and 1.3 means the institution is cited 30% above average. [More on NI](#).

Q1::High Quality Publications

Ratio of publications that an institution publishes in the most influential scholarly journals of the world; those ranked in the first quartile (25%) in their categories as ordered by SCImago Journal Rank [SJR indicator](#).

SI::Specialization Index

The Specialization Index indicates the extent of thematic concentration / dispersion of an institution's scientific output. Values range between 0 to 1, indicating generalistic vs. specialized institutions respectively. This indicator is computed according to the [Gini Index](#) used in Economy.

ER::Excellence Rate

The Excellence Rate indicates which percentage of an institution's scientific output is included into the set formed by the 10% of the most cited papers in their respective scientific fields. It is a measure of high quality output of research institutions.
