It is with great enthusiasm that we announce the 6th International Ottawa Heart Conference to be held April 26th and 27th, 2018 at the National Arts Centre in Ottawa, Ontario.

Hosted by the University of Ottawa Heart Institute and The Ottawa Hospital Research Institute, this 1.5 day event promises to bring together translational scientists, clinician scientists, cardiologists and trainees in cardiovascular science.

This year's theme **Precision Medicine in Cardiovascular Disease** will highlight recent advancements and breakthroughs in preventing and treating cardiovascular disease in a precise targeted manner. The conference will feature some of the latest in systems biology, big data analytics, biomarkers, disease-in-a-dish modeling and personalized health innovations. The science will address impacts on cardiometabolic diseases, atherosclerosis, cardiac arrhythmias and heart failure.

This event will facilitate scientific dialogue, exchange of information, and networking that will enable international collaborative opportunities. Additional sessions outside of plenary lectures will include a trainee career networking event and a public lecture.

We invite you to become an important part of this unique opportunity by participating as an Event Sponsor. A variety of sponsorship levels have been developed and will be available to government, corporate, community, and other healthcare agencies.

Don't miss this chance to be part of this excellent program. Contact us to discuss how you can get involved!
